## Work Experience

### ● Web Developer

January 2023 – Present

- Website Development: Designed, developed, and deployed responsive websites for clients across various industries, utilizing HTML, CSS, JavaScript, and frameworks like React and Next.js to ensure high performance and functionality.
- User Experience Optimization: Collaborated with clients to understand their target audience and business needs, delivering visually appealing and intuitive user interfaces.
- Performance Optimization: Optimized websites for performance, ensuring fast load times, cross-browser compatibility, and mobile responsiveness.
- Version Control: Managed code versions using Git and GitHub for collaborative projects and efficient workflow management.
- Troubleshooting & Debugging: Resolved technical issues and improved website functionality, reducing downtime and enhancing user satisfaction.
- Collaborated with clients, including clothing brands like HVF, to deliver unique and creative digital solutions.
- Designed and optimized websites for performance, improving SEO and user engagement.
- Developing a startup to create scalable web solutions, including a task-based platform for university students.
